

# ELECTRO IGNITION SQUIB EZG-M1 1

## Application

Electro ignition squib EZG-M11 is assigned to initiate the ignition mixtures and rocket fuels.

## Specifications

|                               |               |
|-------------------------------|---------------|
| Squib length                  | 7 mm          |
| Squib diameter                | 4 mm          |
| Cable length                  | 120 - 140 mm  |
| Weight of explosive substance | 0.015 g       |
| Electrical resistance         | 0.5 - 1.6 ohm |
| UN Number                     | 0044          |
| ADR Number                    | 1.4S          |

## Packing

Standard packing consists of 100 electro ignition squib in one carton box.
